

Dear Parent/Carer,

**Video Games and keeping your child safe:
E-safety - key information for parents/carers**

It has been brought to our attention that some of our pupils have been playing console games such as Fortnite, Grand Theft Auto, Scary Granny, Roblox etc even though the certification for these games are 12 even 18 based on International PEGI ratings

Elliott Park School is committed to keeping our children safe and to promoting the safe, responsible use of the technologies. As such, we feel it is our responsibility to raise this particular issue as a concern.

Some pupils are reining acting moves and scenes that they have seen or played and also using the language that these games promote. As per our behaviour policy this is not acceptable.

Many pupils that use Roblox especially are speaking to other players that they do not know.

1) Ratings denote the content and appropriateness of games

Since 2003 games have been age rated under the Pan-European Game Information (PEGI) system which operates in the UK and over 30 other countries of Europe, in addition, where a game showed realistic scenes of gross violence or sexual activity the game had to be legally classified and received one or other of the BBFC classification certificates given for videos/DVDs

The PEGI system has been effectively incorporated into UK law and video games will be age rated at one or other of the following age levels; which you will find on video game sleeves. Ratings do not

denote the difficulty or the enjoyment level of a game, but that that it contains content suitable for a certain age group and above

The PEGI age ratings will enable parents and carers to make an informed choice when buying a game for their children.

It is important to note that the age ratings 12, 16 and 18 age ratings are mandatory and that it is **illegal** for a retailer to supply any game with any of these ratings to anyone below the specified age. The age ratings 3 and 7 are advisory only.

An 18 Rated game is applied when the level of violence reaches a stage where it becomes gross violence and/or includes elements of specific types of violence.

In general terms it is where the level of violence is so visually strong that it would make the reasonable viewer react with a sense of revulsion.

This rating is also applied where the level of sexual activity is explicit which may mean that genitals are visible. Any game that glamorises the use of real life drugs will also probably fall into this category.

2) Content Indicators

In addition to age ratings, video games will include indicators of the type of content and activities that the game includes in it.

The descriptors are fairly self-explanatory but should be read in conjunction with the age rating given for a video game.

A violence descriptor with an 18 rated game will indicate a more extreme level of violence than a violence descriptor with a 12 rated game. Similarly, a sex/nudity descriptor with a 12 rated game will probably indicate sexual innuendo but a sex/nudity descriptor with an 18 rated game will indicate sexual content of a more explicit nature.

3) Parental responsibility

We feel it is important to point out to parents the risks of underage use of such video games, so **you** can make an *informed* decision as to whether to allow your child to be subjected to such images and content.

- The PEGI ratings system helps you make informed decisions about which video games to choose for your family
- A PEGI rating gives the suggested minimum age that you must be to play a game due to the suitability of the content
- As parents you can take direct control of what games your children play at home, how they play them and for how long through parental controls on video game systems such as the Xbox or PlayStation
- Choosing and playing video games as a family is the best way to understand and enjoy them together
- The stories, worlds and characters in video games offer playful ways to engage with a wide range of subjects and fuels creativity, interests and imagination
- The recently re-launched askaboutgames.com website provides further information about video games ratings and offers real family stories and suggestions on how video games can be a creative and collaborative experience for all the family
- We also recommend that all parents visit the CEOP Think U Know website for more information on keeping your child safe online www.thinkuknow.co.uk

4) School support and action

Elliott Park School have a focussed E-Safety projects that pupils participate in, as well as discussing E-Safety issues throughout the year.

If you feel that you, or your child, needs further support in keeping your child safe on the internet, please make an appointment to see Mr Roberts (Head of ICT).

With thanks for your continued support,

Yours sincerely

Mrs C Hiller
Headteacher
